Projects

Venture — Lead Engineer (Unity)

Feb. 2026 - June 2026

- Shipped a co-op survival game to Steam with 18,200+ library adds and 1,500+ players since launch
- Built the core climbing mechanic, balancing responsive physics with expressive gameplay
- Implemented networked multiplayer using Unity Netcode and Steamworks Lobbies
- Used optimization strategies to keep the game running at 60+ FPS across dense environments

BLUE — Systems Engineer (UE5)

Aug. 2025 - Dec. 2025

- Developed clear and maintainable C++ systems, technical specs, and documentation for a team of 30+
- Designed and built the core weapons system, allowing players to swap out attachments mid-game
- Set up the framework for energy tracking and propagation across custom player-built ships

Mantle — Gameplay + UI Engineer (Unity)

Sept. 2024 - May 2025

- Created 2D minigames for six villains, collaborating closely with designers and artists
- Built a dynamic desktop interface with draggable windows, tabs, and video playback

Education

University of Southern California

Expected Grad: May 2028

Bachelor of Computer Science Games, 3.98 GPA

Additional Experience

iD Tech Camps — 3D Printing Instructor

Summer 2026

- Designed and taught an original Blender curriculum, expanding beyond the provided course outline
- Ran 5 weeks of hands-on sessions, troubleshooting individually across a wide range of skill levels

Lakeside Investigate Learning Camp — Counselor

Summer 2024

- Taught 5th-8th graders, managed rooms of 20 students, supported struggling students during class

Interests

Figure skating, ballroom dance, illustration, 3D printing, guitar
