- **3D/Tech Art:** Modeling, Texturing, Animation (Blender); VFX Graph, Shader Graph (Unity)

Selected Projects

Venture — Lead Engineer (Unity)

Feb. 2026 - June 2026

- Shipped a co-op survival game to Steam with 18,200+ library adds and 1,500+ players since launch
- Built the core climbing mechanic, balancing responsive physics with expressive gameplay
- Implemented networked multiplayer using Unity Netcode and Steamworks Lobbies

BLUE — Gameplay Programmer, Designer (UE5)

Aug. 2025 - Dec. 2025

- Developed clear and maintainable design docs, technical specs, and roadmaps for a team of 30+
- Wrote C++ code in Unreal Engine to create a physics-based spaceship building system

Mantle — Gameplay Programmer (Unity)

Sept. 2024 - May 2025

- Worked as one of three engineers, creating gameplay features for a team of 27
- Took a leadership role, coordinating with other departments and helping set coding standards

Education

University of Southern California

Expected Grad: May 2028

Bachelor of Computer Science (Games), 3.98 GPA

Lakeside High School

Class of 2024

National Merit Scholar Finalist, 4.0 GPA

Additional Experience

iD Tech Camps — 3D Modeling Instructor

Summer 2026

- Designed and taught an original Blender curriculum, expanding beyond the provided course outline
- Ran 5 weeks of hands-on sessions, troubleshooting individually across a wide range of skill levels

Lakeside Investigate Learning Camp — Counselor

Summer 2024

- Taught 5th-8th graders, managed rooms of 20 students, supported struggling students during class
- Improved efficiency of cleaning, setup, and check-out procedures by designing and leading new systems
